

# CRYSTAL HOLLIS

## DATA ANALYST | AI & AUTOMATION | ENTERPRISE SYSTEMS

Dallas, TX | (940) 268-9701 | [crystaljhollis@gmail.com](mailto:crystaljhollis@gmail.com) | [crystaljhollis.com](http://crystaljhollis.com) | [linkedin.com/in/crystaljhollis](https://www.linkedin.com/in/crystaljhollis)

### PROFILE

Data analyst and automation professional connecting Python, R, GIS, enterprise data quality, and technical communication. Builds reliable workflows for complex operational information, documents limitations, and translates results for technical and nontechnical partners.

### TECHNICAL SKILLS

|                 |                                                                                                         |
|-----------------|---------------------------------------------------------------------------------------------------------|
| Languages       | Python, R, SQL concepts, MATLAB, Kotlin, HTML/CSS                                                       |
| Data & ML       | pandas, NumPy, Matplotlib, Jupyter, AutoGluon/AutoML, exploratory analysis, data quality                |
| Systems & Tools | Workday Student, Ad Astra, Colleague, SharePoint, ArcGIS Pro/ArcPy, Excel, GitHub, Adobe Creative Suite |

### EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                 |                                                                          |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|
| DALLAS COLLEGE   Dallas, TX                                                                                                                                                                                                                                                                                                                                     | Schedule Data Analyst   Dec 2025 - Present                               |
| <ul style="list-style-type: none"><li>Analyze and reconcile districtwide academic scheduling data across Workday Student, Ad Astra, Colleague, SharePoint, and Excel; validate course, room, and faculty assignments.</li><li>Investigate root causes and exceptions, document audit-ready evidence, and coordinate issue resolution across campuses.</li></ul> |                                                                          |
| SOUTHERN METHODIST UNIVERSITY   Dallas, TX                                                                                                                                                                                                                                                                                                                      | Freelance Post-Production Specialist & Metadata Analyst   2018 - Present |
| <ul style="list-style-type: none"><li>Conduct post-production and metadata workflows supporting an archive of more than 2,300 video jobs.</li><li>Built Python utilities for storage analysis, file renaming, shot-list generation, and metadata support; analyzed more than 120 TB across 302,933 folders.</li></ul>                                           |                                                                          |
| MAGNA MEDIA ARTS LLC   Dallas, TX                                                                                                                                                                                                                                                                                                                               | Managing Owner   2020 - Present                                          |
| <ul style="list-style-type: none"><li>Led client multimedia production and edited more than 100 hours of video while managing requirements, budgets, invoicing, and delivery.</li></ul>                                                                                                                                                                         |                                                                          |

### SELECTED PROJECTS

|                                   |                                                                                                                         |
|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Enterprise Media Storage Analysis | Python pipeline quantified 120+ TB across 302,933 folders and supported a 10-14 TB annual planning estimate.            |
| Hope Supply Geocoding Pipeline    | Python and ArcPy workflow prepared 68 nonprofit partner locations for mapping with confidence-based manual review.      |
| TSA Claims Analysis               | R analysis of 94,848 public records identified a 24.4% approval rate and documented highly skewed claim values.         |
| Reproductive Healthcare Research  | Exploratory maternal mortality analysis paired with an intersectional research paper and explicit modeling limitations. |

### EDUCATION & CREDENTIALS

|                           |                                                                                                                                                                                                                                                                               |
